The Drug Label Collection

Distinctive Medical are the first choice for medical labels for many hospitals across the UK. We produce all our labels in-house to offer you a fast turnaround time and lower minimum order quantities.

We stock a large range of labels that display clear messages and warnings. You can see a selection of our stock labels in the section below.

See our standard drug labels on [page 3](#) that are colour coded and feature a clear font to make drugs easily identifiable. See the full A-Z of drug labels starting from [page 6](#).

We also create custom labels that can be printed onto either a sterile label or our standard label stock – see [page 4](#) for further information.

To order labels or to find out more please call us on 01928 571 801 or email info@distinctivemedical.com

Stock Labels

Our stock labels are attention-grabbing and display vital messages that both clinical and non-clinical staff can understand. See the full range of stock labels at www.distinctivemedical.com/medical-labels or scan the QR code.

Distinctive Medical Drug Labels

Drug labels are an effective way to distinguish lookalike and soundalike drugs to help prevent human error.

All our drug labels are colour coded, clear to read and have strong adhesion.

As a healthcare company, we work in strict adherence to the guidelines set by clinical organisations:

- ISO 26825-2020
- The Royal College of Anaesthetists
- The Association of Anaesthetists of GB & Ireland
- The Faculty of Accident & Emergency Medicine
- The Intensive Care Society

See the full A-Z of standard drug labels we offer from [page 6](#) onwards. If you have a special request our Artworks and Printing team are on hand to design and produce the labels you need, see [page 4](#) for more information.

Drug labels come sealed in our small plastic clamshells

Free 10 and 20 Roll Drug Label Dispensers

Keep labels tidy and organised with our dispensers specially designed to fit Distinctive Medical drug labels. Receive a free 10 roll dispenser when you order a minimum of 10 packs of labels or one that stores 20 rolls if you order 20 packs of labels or more!

The dispenser features one touch hygienic dispensing for increased infection prevention.

Same size dispensers can be connected together to be stacked securely and are quick to load and thread. They also feature holes on the back panel for easy wall mounting. Brackets are also available for under shelf fitting.

Easy
to
stack

Sterile Labels

Our sterile labels are completely customisable and sealed in sterile pouches, you only order what you require, therefore eliminating wastage. The labels feature a strong residue free adhesive to ensure they can easily be removed from equipment after use.

All sterile labels are latex-free and made from a high quality waterproof synthetic label stock. Choose to have your labels printed colour coded, black or white to suit your processes.

Ordering sterile labels packs couldn't be simpler:

- Choose your labels
- Choose your pack size - **10** or **20** labels, with or without pen
- We'll print and sterilise your customised packs

Custom Labels

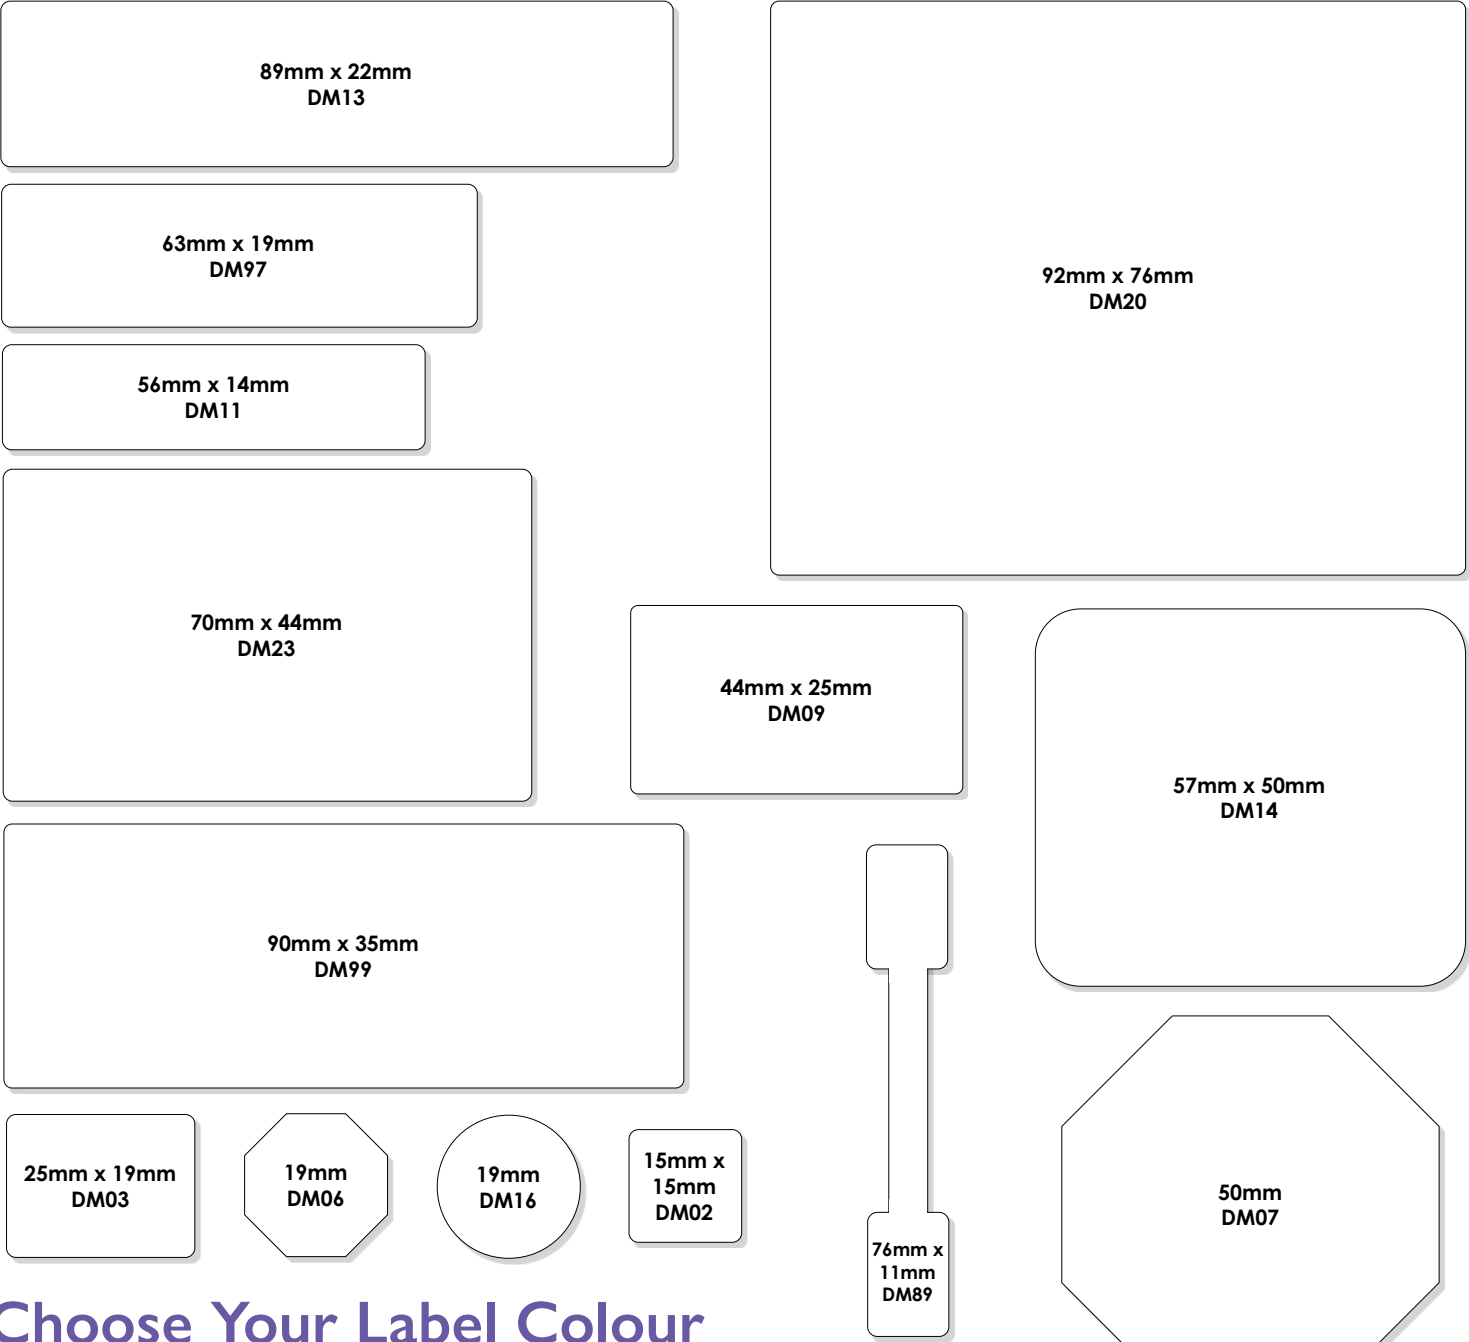

If you can't find the label you need or have a custom request, follow the steps below to create your own label.

- First choose the size of label you require - [see page 5](#)
- Next, choose the label colour - [see page 5](#)
- Then email your selections, text and text colour to info@distinctivemedical.com
- We will then send you a proof free of charge
- Once the proof is approved, you can then place your order.

The label pack size is 1,000 labels, presented as 2 rolls of 500 saving you time when ordering stock with our bigger pack sizes. Roll size may vary depending on label size.
